

English Language Arts

Version 2.60

© Miaplaza Inc.

- **Target Audience:** This language app allows children to practice identifying different word types. It also informs students about punctuation, letters, and how to spell words.
- **Types of Software:** This app can be used on iPad's, iPhone's, and iPods. It works best when used individually or in pairs by mid-level students.
- **Curriculum**
 - This app would be perfect to teach mid-level children the fundamental principles of the English language. It creates the foundation for grammatical concepts.
- **Cost:** This app cost \$1.99
 - There are no in-app purchases required for this app.
- **Description of software:** Children practice identifying nouns, verbs, pronouns, and adverbs. They also learn about punctuation, letters, and how to spell. Children can also become more familiar with rhyming words/phrases. Correct answers are highlighted if students get answers wrong. Many students can benefit from receiving the correct answers.
- **Impression of software:** ELA is a great app to inform students the English Language. Questions get progressively harder which offers a lot practice and learning review for students. Students win medals and points for completing sections of the game. This can engage many children to master the English Language.
- This app passed our software evaluation.
