

CAN YOU NAME THE COIN?

Subject: Mathematics

Grade: 2nd -Mathematics: AR. Math.Content.2.MD.C.8 : Solve word problems involving dollar bills, quarters, dimes, nickels, and pennies, using \$ and ¢ symbols appropriately

Tools: Powerpoint & Kahoot

Synopsis: For this lesson, start by using a premade powerpoint to explain the different types of coins. The students should be able to understand the 6 different types of coins, who is on each of them, and the value for each coin. While you go through the powerpoint, ask the students word problem questions as a warm up for the Kahoot game. After finishing the powerpoint, have the students get their iPads out to play Kahoot. This lesson should give the students a better idea of the use of coins. The lesson should also enable students to add up prices. This could be used if they go to the store or anywhere they could be adding or subtracting money.
