Cosmic Kids

Cosmic Kids is a yoga app designed for kids ages 3 to 9. This app falls into the category of drill in practice or tutorial because these skills could be new to the students at first but after a while become drill in practice. This yoga app fits into curriculum to give the students a break from learning in a classroom setting. It can be used as a brain break exercise time or as a PE for exercise days. The cost for this app was \$9.99 a month or \$64.99 a year there is a 14-day free trial.

This app loaded correctly, and the software did not crash. The content was appropriate for kids' ages 3 to 9 and the screens were colorful and appealing. This app is also very easy to navigate and learn, and a student does not need supervision to use this app. The app did not require a response from the students the app has a cool feature where you can create a library of your saved favorite videos. I think this app is very similar to Go noodle, but it is geared to a specific learning outcome more than Go noodle is.
