

Title: Qrafter

Version: 19.1 is the version and it seems to have monthly updates to keep itself up to date.

Publisher: the seller is Ali Kerem Erkan, and the copyright is as well.

Target Audience: The target audience for this app says 4 and up, I feel like it would be great for children in upper elementary, but not as much for the younger grades. It has built in safety features that check web browsers and does not allow certain links to open within the app.

Curriculum(s): This app allows you to basically use it how you want and to suit your needs. I think it would be a great app to be able to pull out of the tool box to make lessons more interactive. It is very self-explanatory and allows you to use it to its fullest potential. I think it would be great to enhance lessons or projects, and that if you are looking for a fun and easy way to bring a topic to life that Qrafter would be a great app to allow you to do such a thing.

Possible Environment(s) and why: This could be used in many ways for videos, lectures, for yearbooks you could have short clips throughout the year that are captured and linked to a picture within a yearbook and it just makes the material more fun and interactive for your students.

Cost: Free but does include and in-app purchase known as the pro pack and it is \$2.99.

Impression/How you would use in classroom: this app is a two-dimensional barcode scanner for iPhones, iPad and the iPod touch. The main purpose for the app is to scan and parse the contents of the QR code that it is given. It also can generate a QR code. This could be used in the classroom with books or maybe even a scavenger hunt for clues or linking videos in a set of notes that a teacher might have, it also would be a great tool for students to have in presentations or in reports to make it more fun and entertaining for all teacher and student.

Does software pass: I believe that this software does pass and allows students and teachers to use the app in the way they are hoping to fulfill a need or be able to enhance and make a lesson how they wish. It also is very easy to use which makes it another reason for the app to pass as a quality app to be used within the classroom.
