Title: My Study Life

Version: 3.2.1

Publisher/ Producer / Creator: My Study Life, Ltd.

Target Audience: 4+

Type of software: Tool. My Study Life would be considered a tool because users are able to create a personalized planner where you can store class schedules, homework assignments, and exam times all in one place.

Curriculum(s) (Possible environment(s) and why): This app could be used in any curriculum as it is a create as you go. The user is in control since it is a planner type of app. Could work for students individually or for teachers to show them what content and reminders to add in!

Cost: Free to download

Description Paragraph: The main color scheme is a neutral green, and then each class subject you can pick the color. It allows you to put the building and room number the classes are in and the time and days for the subjects. You can add holidays, tasks, exams, and schedules. This app works like a planner, it could be used for teachers to keep classes separated or for students to keep their classes separated and reminders for homework. It is easy to navigate and simple to get from one area to the other.

Impression and Usage Paragraph: This app works like a virtual planner. It has no sounds or pictures but since it is more task oriented it doesn't need them. The colors are scarce but for the app it works well since you can add as much content as you want. There are no in-app purchases and navigation is up to the user. You get to create it as you go, you can add and delete as much as you want. This would be good for teachers and students to use together or separately.
