

**Title:** Planboard

**Version:** 2.27.2

**Publisher/ Producer / Creator:** Chalk.com Education Inc.

**Target Audience:** 18+

**Type of software:** Tool. This app allows teachers to create lesson planners and plan out standards and expectations.

**Curriculum(s) (Possible environment(s) and why):** This app could be used for students to create their own lesson plans in the classroom. This could be a follow up to one they were shown or taught, just so they get a better feel of the importance of subject standards and why they are taught.

**Cost:** Free

**Description Paragraph:** The first thing the app asks for is the semester and when it starts and ends. Then it asks for a semester rotation and to create a subject. For the heading and section, you are allowed to pick a color of your choice. There is a section to add curriculum sets, you can add a many as you want. There are instructions after each click. You can add as many sections and subjects as needed. There is a timetable section and you can insert a class/days taught/start and end time. From there, it allows you to create lesson plans and share.

**Impression and Usage Paragraph:** This is a really great app for newcoming teachers. It is simple and since it is free each teacher has access to it. It is straightforward and works like an organizer/calendar for each class. It allows teachers to see each class they have and separates them by day or subject plan. There weren't any sound effects or popups, which personally is better since the target audience is older.
