*Publisher/Producer/Creator:* Khan Academy

*Target Audience:* K- 12

*Type(s) of Software:* Tutorial- There are numerous videos that provide instructional information regarding certain subjects.

*Curriculum(s):* Any subject

*Cost:* Free

*Description:* This app is a personalized learning resource for all ages. This offers practice exercises for various grades, instructional videos, and a personalized learning dashboard that empowers learners to study at their own pace in and outside of the classroom. There are even multiple drill and practice exercises that deals with the act/sat which is very beneficial for the secondary level. The fact that it is free is even more of a reason to use this app. This can be used by teachers, students, and even parents. This app is also used in different languages which can be essential when it comes to a classroom/family with a diverse cultural background.

*Impressions/ Use in Class*: This seems very beneficial overall. With the fact that it's free and easy to use, I was all about it. Out of all the apps that I've used so far, this was hands down the easiest. The setup was very easy to navigate. There were no ads in any part of the app which was nice and made it very easy to navigate. The number of subjects that was offered was very

beneficial, and the instructional videos were very helpful when it came to demonstrating the drill and practice problems.

*Does the Software pass review?* Yes
