Khan Academy

Age of Learning, Inc.

Version: 1.010.002

**Target Audience:** The app is geared towards students and recommended ages 4+. It's great for students of all grade levels and ages.

**Type of App:** This app could be used as a tool or for drill and practice. It's good for learning idea, studying, and practicing skills.

**Curriculum:** Khan Academy is best for math and science, but they also have resources for the rest of the subjects as well.

**Cost:** Khan Academy is both free and a non-profit.

**Software Description:** Khan Academy is a program that allows users of all ages and backgrounds to learn skills for free. It includes video tutorials on topics that children (and adults) sometimes find difficult to master. There are drill and practice activities after each video and users can practice for as long as they need.

**Impression of app:** We love Khan Academy. It really helps teach or re-teach topics and skills. It's good practice for anyone and has a huge library of topics that are covered.

**Does it pass?** Yes!
