App Evaluations

Erika Snow-Howard and Stefanie Kennedy

Total Recall

Zyense

Version: 5.0

Target Audience: The app is recommended for ages 4+, but we think that it would work better for older elementary students and above.

Type of App: Tool

Curriculum: The app can be used for all subject areas. Teachers and students both can create mind maps that enhance lessons.

Cost: There's a "lite" version that allows users to create three free mind maps. After that, it's only $0.99.

Software Description: Total Recall is similar to an electronic whiteboard, but users can add video and recordings created by themselves to it. It's a nice tool to use to organize information.

Impression of app: We enjoyed this app. It was easy to learn and navigate. It's a useful tool to organize information and present it to a classroom or others.

Does it pass? Yes.
