

App Evaluations

Erika Snow-Howard and Stefanie Kennedy

codeSpark

codeSpark

Version: 2.34.02

Target Audience: The app is recommended for ages 4+. We recommend it for ages 8 to 12 years old.

Type of App: Tutorial

Curriculum: This app could be used in STEM activities or coding lessons.

Cost: codeSpark is free for 7 days and then it's \$7.99 per month.

Software Description: codeSpark uses a "no words" approach to teach children to code. The idea is to teach children to think critically to understand how to code. It makes it seem like a game for storytelling.

Impression of app: We didn't enjoy this app. It seemed difficult to use and hard to understand.

Does it pass? No.
