## Mini Lesson 1 : News Report Project

Grade level : 6th

Curriculum Topic : Weather and Climate

Tool and Tech : iPads , iMovie application, green screen application, padlet application , Word docs

Lesson Summary: Students will be split into groups of four and each group will select a weather storm that would like to complete their project on. Students will use information on weather storms to create either a news broadcast, weather report, or interview that demonstrates their understanding of the storm they've chosen. Students will use technology including the Internet to write a script, create a storyboard , produce their video , and publish their video. Students will work together on creating a script in a word document and collaborate on the storyboard using Padlet. Students will have to incorporate at least 3 special effect backgrounds using the green screen and green screen application. Student videos will be required to be between five and seven minutes long. I could use their videos as an informal assessment or a cool way to review before an exam.
