Possible Environments and Why	Single user, lab setting, at home
Cost (is there a free and a paid version)	Free
In-App Purchases?	Can have a subscription

Describe the software (1-2 paragraphs):

"Assume I know nothing about the software. There needs to be enough description so that I can visualize this software"

- This software teaches various subjects through a variety of interactive learning activities including books, animations, art activities, songs, puzzles, and games. It helps accelerate the learning two to three times faster than usual. The children can level up and the levels can be adjusted in the setting to always start at level one. As a teacher or parent, you can have the option of being able to select

specific activities within the classroom. You can select activities by subject, as well as level.

Impressions of the software/how it can be used in your class (1-2 paragraphs):

"Include good and bad aspects of the program and/or things that were well done. For example, navigation was easy, screen design was good, sound effects were used effectively, and feedback was effective and immediate..."

"Do you disagree on anything (from publisher or any review)"

- We really enjoyed this app and highly recommend it to the parents of our future students if they need extra help at home. It can be used in our classrooms if the children finish an assignment in time, or if we have technology time where they can get on this app and work on subjects that they need help with. The reviews of this app were very good and ABC mouse was spoken very highly. The navigation was easy for students to use and they can easily scroll through all the different subjects.

"Does the software pass **APPS**"

- This software passes APPS.

ALL evaluations need to be saved in word and PDF. The individual software evaluations must be posted on the web (PDF version) (Word because you and your partner need to agree on the contents.)
