Title	Art for Kids Hub
Version (if there is one or if it is one of a series)	Version series:
Publisher or Producer	Developer:
Target Audience (if your opinion differs from the publisher, state that)	This app is targeted for young students interested in art and drawing.
Type(s) of software with your justification (can be more than one)	- Drill & Practice- students can apply what they already know about art to create new images with this software.
Curriculum(s)- How does it (or can it) fit into the curriculum	This app can be used in any art class or in the regular classroom when drawing is required.
Possible Environments and Why	Single User- students can use this app for educational purposes or for fun.
Cost (is there a free and a paid version)	This app is free.
In-App Purchases?	There is a one week free trial for a subscription, after that there is a monthly charge of $5.99.

Describe the software (1-2 paragraphs):

"Assume I know nothing about the software. There needs to be enough description so that I can visualize this software"

-        The app Art for Kids Hub provides access to a massive catalog of art lessons and exclusive videos if you decide to pay for a membership. The app provides art lessons that focus on strengthening a child's skills so it can enable them to create anything they imagine. There are videos that require little prep so the kids can jump right into their art. The videos are step by step tutorials of how to draw pretty much anything you can imagine.

Impressions of the software/how it can be used in your class (1-2 paragraphs):

"Include good and bad aspects of the program and/or things that were well done. For example, navigation was easy, screen design was good, sound effects were used effectively, and feedback was effective and immediate…"

"Do you disagree on anything (from publisher or any review)"

-        This app is creative and fun. We thought that we could use it in our classrooms for holidays like valentines day, thanksgiving, etc., and have our students integrate technology to make art more fun. We could play the tutorial in the front of the room so the students can sit at their desk and follow along. The app was a good idea, but you have to subscribe to this app to view the videos. There are easier ways to find art tutorials that cost nothing. The navigation is very easy as you scroll through different art and you can even search for a certain idea.

"Does the software pass **APPS**"

-        This app passed APPS.

ALL evaluations need to be saved in word and PDF. The individual software evaluations must be posted on the web (PDF version) (Word because you and your partner need to agree on the contents.)
