Possible Environments and Why	In one computer classroom for teachers to put up front, or for at home
Cost (is there a free and a paid version)	Free
In-App Purchases?	Free

Describe the software (1-2 paragraphs):

"Assume I know nothing about the software. There needs to be enough description so that I can visualize this software"

- The Cosmic Kids app has fun yoga and mindfulness videos presented by a lady named Jaime. Kids follow Jaime as she goes on yoga adventures and explains mindfulness in ways that they can really understand. There are many different yoga adventures including Frozen, Star Wars, Minecraft, and Moana special. There are Zen Den mindfulness sessions and guided relaxations as well. These videos include songs and stories that are original or from very common things that the children know like Frozen and Moana.

Impressions of the software/how it can be used in your class (1-2 paragraphs):

"Include good and bad aspects of the program and/or things that were well done. For example, navigation was easy, screen design was good, sound effects were used effectively, and feedback was effective and immediate..."

"Do you disagree on anything (from publisher or any review)"

- We really enjoyed this app because it relates to the children with common movies or games. This can be used in our classroom for transition times, for example, before the students take a test, we can put on a relaxation video so the students can relax and get in the right mindset before taking it. This app is very easy to use and very organized. The screen designs were bright and fun which makes it more enjoyable for the students. There were many reviews we agreed with because all of them were very beneficial for the students.

"Does the software pass **APPS**"

- This app passed APPS.

ALL evaluations need to be saved in word and PDF. The individual software evaluations must be posted on the web (PDF version) (Word because you and your partner need to agree on the contents.)
