Title	PlanBoard
Version (if there is one or if it is one of a series)	Version series: 2.26.1
Publisher or Producer	Developer: Chalk.com Education Inc.
Target Audience (if your opinion differs from the publisher, state that)	This app is targeted for teachers. Although the publisher states it is intended for ages 4+, there is no reason students would need to use this app.
Type(s) of software with your justification (can be more than one)	<ul style="list-style-type: none"> <li>• Tools- teachers can use this app in their own way to make their lesson and schedule their own.</li> </ul>
Curriculum(s)- How does it (or can it) fit into the curriculum	This app can be used by the teacher to limit the amount of time spent planning the lesson.
Possible Environments and Why	Teacher Tool- the teacher can use this to plan lessons in his or her classroom.
Cost (is there a free and a paid version)	This app is free.
In-App Purchases?	There were no in-app purchases.

Describe the software (1-2 paragraphs):

PlanBoard is a teacher tool used to create, edit, and share lesson plans. Users are able to organize their timetable, subjects, and semesters. This app is intended to help limit the amount of time the teacher spends planning the lesson prep time. Users are able to edit curriculum standards and attachments in an easy and efficient way.

Impressions of the software/how it can be used in your class (1-2 paragraphs):

We personally did not really like this software because it was way more complicated than it needed to be. This app works well for teachers who are good with apps like these and want to plan more detailed days that they cannot use a calendar or planner for. However, we prefer Google Calendar over this app. Both apps essentially do the same thing, but PlanBoard just applies extra, unnecessary steps.
