OSMO Words & Wordle

We will split up in small groups and start our centers. One center will involve OSMO Words, one with Wordle, one with crosswords and one reading group with me at the table. The OSMO Words group will have the iPads set up and the students will set up their account on the iPad. They have a set of letters that they lay down in front of the iPad that the OSMO can read and a picture will pop up and the children must spell it out. The Wordle group will build word art that they will print out and share. They must find adjectives to describe themselves and type those into the textbox. Wordle automatically puts the words in an art form and the children can customize the color, font and style. Crosswords group will work together to figure out the answers and fill out the crossword puzzles. My reading group will be student led and focus on their individual reading levels. I will be taking note of how the students are progressing.
