Kahoot! & Classify It

Students will work individually on the Classify It App. With the Classify It app, the children can create their own profile. Then it will make a statement like “Living Things That are Animals” and it will have a group of pictures. The students will then have to pick which of the pictures are living things that are animals. If they are right they will move on if they are wrong they can try again or ask for help. After about 15 minutes we will start our Kahoot! The Kahoot! will be over the five kingdoms.
