

Rain, Rain

We have all heard the nursery rhyme “rain, rain go away, come again another day, “but that’s not the case for our class. As young scientist, we need the rain in order to collect data and make predictions in the weather. We have been collecting data all year for this project and we are revealing our discoveries May 18th! Come see what our discoveries have taught us and what we may teach you.

*Come and join our class for our
annual Rain Dance Party!*
