

**Grade:** 2<sup>nd</sup> Grade

**Curriculum Subject:** Science/Ecosystems

**Tools:** QR Code App and Microsoft PowerPoint

**Environment:** Students will work independently and travel to 6 different stations set up on the room.

**Synopsis:** The room will be set up with 6 different stations. Each station will be about a different animal and will have 3-4 QR codes about the animal and where it is from. At the stations, students should scan the codes and write down information about the animal that they feel is important. Once they have visited all 6 of the stations and have enough information, they will go back to their desks and pull up PowerPoint. On PowerPoint, they will independently create a presentation about the animal using the information from the QR codes.
