

Title: Explain Everything

• **Version:**

Explain Everything Whiteboard

Version 5.5.10

Other Versions: Explain EDU

• **Publisher or Producer:**

Explain Everything sp. z o.o.

• **Target Audience:**

Publisher states 4+...disagree and think it should be at least 7+; could be used in elementary through adulthood.

• **Type(s) of software with your justification**

We believe that this software is a discovery learning type of software. This software allows the user to choose what will be learned. It can also be used as a tool. Teachers can send notes to students and let the students mark it up as they like.

• **Curriculum(s):**

Explain Everything Whiteboard is a hands-on way for students to collaborate easily while being creative in projects and note-taking. This app allows its user to create projects using their own images, the apps images, recordings, and text boxes. They can then share their project with other users and work together on the project. There are options for students to create videos, animations, and images to meet the needs of the classroom. This app could work on projects for any subject, and at a smaller level could even be used as an advanced note-taking system.

• **Cost:** Premium Monthly: \$6.99 (7-day free trial)

Yearly: \$69.99 (30-day free trial)

Explain Everything™ Individual License \$12.99

Explain Everything™ Individual License \$107.99

Explain Everything™ Business Group Monthly License 5 \$59.99

Individual annual plan \$107.99

Individual monthly plan \$12.99

Individual monthly plan \$6.99

- **Write a paragraph or two describing the software:**

The app is set up similar to the paint app, with a tools bar on the side to insert items, make text boxes, and draw images. There was already a pre-made project up so that we could see the way the app could be used. The app gave us the option to use their own images or insert our own. There's also the option to record audio, animations, and videos, but we could not find the option to make animations. Some options are blacked out since we did not buy the app, and we could not save any work either. It was easy to use their images to make a small project of our own, and we just made a simple outdoor scene using the app's clipart. There are also options to do insert math equations and numbers, shapes, and text.

- **Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class**

This app is really interactive and elaborate. There seem to be endless possibilities for the number of projects a student could do. We think that it would be a lot of fun to be able to use our creativity on our notes, projects, etc. There is also a downside that we believe this app can have. It can be time consuming and distracting as much that is put into this application and what all can be done with it.

- **Does the software pass APPS:**

We believe that it passes as an application. It is very versatile and easy to use. It can serve any purpose that a person's heart desires.
