

Grade: 2nd Grade

Curriculum Subject: Internet Safety/English Language Arts: Research

Tools: the book “The Technology Tail” and Padlet

Environment: Students will work on this assignment independently and create their own Padlet boards.

Synopsis: This lesson will focus on online safety and correlate to 2nd grade standards for researching. This is a lesson that will need to be done at the beginning of the school year to go over the class AUP and technology rules. I will start the lesson by reading “The Technology Tail” by Julia Cook aloud to the class. This book will introduce the class to the concept of a technological footprint and the importance of being careful online. I will then project the classroom AUP to the class and go over the rules. (They should have already taken these home, so this part of the lesson is review.) I will instruct the students to go online and research online safety and rules for technology. In Padlet, they will need to make their own technology boards where they can compile the websites and research they collect.
