

**Title:** QR Code Generator & Creator

• **Version:**

Version 1.1

• **Publisher or Producer:**

TapMedia Ltd

• **Target Audience:**

4+ We believe this is accurate.

• **Type(s) of software with your justification:**

This would definitely be defined as a tool software. The user would use this tool to help them to create a QR code for anything and everything that they would like to. This is a QR Code creator app and it would be used for the users to create their own QR Code to meet their needs.

• **Curriculum(s):**

Teachers could use this to make QR codes to pretty much anything. They could make a QR code to a website for students that they will be using for a particular lesson. College students could make one for their phone number or text messages. Professors could use this to make a QR code for their email address.

• **Cost:**

Initial: Free

Upgrade premium: \$2.99

• **Write a paragraph or two describing the software:**

This software is useful for people who want to create their own QR codes for all kinds of different things. It is easy to navigate and use. Just click the create new QR code, select the kind of QR you wish to create, and color customize it anyway you would like. The QR code can be converted to photos and the user can print off and post it anywhere they would like. To access all aspects of this application, the user would be expected to purchase the full version for a onetime cost of \$2.99. This will give the user full access to personalize their QR with all kinds of variations.

• **Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class:**

We were absolutely impressed with this app. It made it so easy to be able to create a QR code and there are so many different ways that a QR code can be used for. We even created a QR code for a link to our websites and they actually worked. We can see using this application within our own classrooms by having students go around the classroom to scan different QR codes on their Ipads (if available) that will take them to different

interactive educational games that correspond to the current lessons. The students will love the games and we, the teachers, can make sure that the students are on the right websites without having to write down the long HTML site on the board where some students will still type in wrong.

- **Does the software pass APPS:**

This is a very useful app that we believe anyone could find useful to meet their own needs. It is so versatile and freely available.
