**Title:** TeleStory (Movie/Video Creator)

• **Version:**

Version 1.5.1

• **Publisher or Producer:**

Launchpad Toys

• **Target Audience:**

This is targeted towards 6+ audience.

• **Type(s) of software with your justification:**

We believe that this application is a Discovery Learning type of software. It allows the user to choose what they learn and what they want to make their video/movie over. We also believe that this application is a tool because the user can use this application to make a movie because that is what it is designed to do.

• **Curriculum(s):**

The way this application can fit into the curriculum is endless as a teacher's imagination. Teachers can have their students use this app to make lesson themed videos with facts over the current less.

• **Cost:**

It's Free!

• **Write a paragraph or two describing the software:**

This application is made for people to make self-stared videos that are accompanied with sideline animations. It is kind of like snapchat with filters. First, we can choose the theme we would like to start with. There are several to choose from. Second, we either choose premade index cards to read or write ones of our own. Then, we record the message to complete each scene. The scenes are completely up to the user and can be completely made up. One of us made a short movie about missing socks! It was a lot of fun to make and very easy to do.

• **Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class:**

We like this easy to use video creator and thought it would be perfect for students to use in class. We could use this app with students by having them acting out a storyline in history or in a story that we're reading. The only suggestion that we would make is to have themes and lines already picked out and made for students for easier workflow within the classroom. We liked that the app had theme music to go with the themed filters. We

thought that there could've been a little more option when it comes to the themes, but this app allows for restrictions that would be necessary with students.

- **Does the software pass APPS:**

 We Believe that this software passes as an application because it's fully functional for anyone to make a funny video or a serious one over a detective story. It allows the user to be creative while also having a guide to go by when needed.
