

**Title:** Total recall

• **Version:**

We only found the one version of this application

• **Publisher or Producer:**

Indrani Ghatore

• **Target Audience:**

17+ and we believe that it is correct. This would be very useful for college students and high school students getting ready for college.

• **Type(s) of software with your justification:**

We believe that this app is a drill and practice type of software. This application focuses on retention and repetition which is exactly what drill and practice consists of. This app drills in "A thorough understanding of words" as put by the app itself.

• **Curriculum(s):**

Teachers can have students practice and learn new vocabulary words. This can be a way for teachers to incorporate academic language support. It can be used across all subject matters dealing with vocabulary.

• **Cost:**

Free and only version.

No In-app purchases

• **Write a paragraph or two describing the software:**

The user starts with the application by adding a new word to their terms section. Once you type in the word, google brings up different definitions of that word. The user can then copy and paste the definition they want to use or write a definition that makes sense to the user. Once that is done, the user will make sense of the word by writing a story of the word, deconstructing the word and making a connection with the word. This allows the user to better understand the word and they would be more likely to remember.

• **Write a paragraph or two on your impressions of the software and possibly how you see the software being used in your class:**

We weren't super impressed with this application. It is easy to use but it would take a lot of time for the users to write a story on each practice word, while also deconstructing and making a connection. This would have to be done with every single word. It would be handy for vocabulary lists that are short. Or even helpful for students whose teachers who have already created these words flash cards. This can help students to get a correct definition for the words the teacher wishes to define.

- **Does the software pass APPS:**

We believe that this app passes as a software application. It is useful and applicable to users. People can use this app to grasp a better understanding of new words.
