

Hannah Bridger

Grade level: 1st Grade

Curriculum topic: Science - Mammals

Tools: GoogleDocs + Peergrade

- In google docs, each student will name 7 mammals that they can think of and what each of them look like. (characteristics)
- With peergrade, each student will post their google docs with their answers and then each student will be assigned 1 peer to review and grade. This will not only get papers graded and participation points, but it will also teach students other mammals that maybe they did not think of.
