

Wish-list Project

In my first-grade class, I have 22 students. I have 10 girls and 11 boys. There are currently 5 seven-year old's, 13 six-year old's, and 4 five-year old's. My class is split into groups when it comes to tables vs. desks. I have 2 groups of five students per group on one side of the classroom. Then, I have another set of tables with 2 more groups of 5 students per group on the other side of my class. Then in the front closer to my desk I have Charles, that is always in trouble the closest to my desk that is also always in trouble. Lastly, I have one student that is in the front because she cannot see very well and forgets her glasses at home a lot of the time.

Teaching first grade, we do a lot of hands-on activities and a lot of learning activities on our group iPads that we have in class. A few things that I would add to a wish-list would be;

- 22 iPads: one for each student to have / able to keep at their desk during class
- 1 MacBook Air for myself to carry around the classroom if I needed
- 1 Mac PC to be able to have a bigger screen when I am checking emails, playing videos or showing things from my computer onto the projector
- 1 Mac Ultimate Pen for when I write on the board to interact with my projector
- Ultimate access to Kahoot, Khan Academy, Padlet
- A charging cart that's able to stay in my room with a lock on it for the students to keep their iPads in and charged while they were in there.
- Projector
- SmartTV

It would be ideal to have my own personal copier, printer, and laminator within my classroom to make it easy and accessible to use. I would want a small library/shelves filled with books that my students would enjoy. I would want a large budget from the school to be able to decorate and supply the arts and crafts that I would want to use to make education more fun.
