

Hannah Bridger

Grade Level: 1st Grade

Curriculum Topic: Compound Sentences

Tools: How to Code a Sandcastle + BouncyBalls

- How to Code a Sandcastle is a good and it will be used to let the students locate the compound sentences. I will make copies of this book for the students to read as a group. With this being groupwork, the volume in the room can get loud if it's not controlled.
- BouncyBalls will be used to monitor the noise level of the room. I love this tool because of the amount of help it serves for a teacher. I think that the kids will be able to understand and then are able to see how loud they are and how much they need to tone it down if need be.
