

Birthday Graphs

Grade – Kindergarten

Subject – Math

Tools – Google Forms and Excel

Synopsis – Students will first fill out a google forms with their birthday and their favorite food.

They will then go to an excel sheet that is shared between the class and graph which month they were born in and which favorite food is theirs. After every student does this, I will put it up on the board for the class to see as whole and ask them questions about the graphs. An example would be; “How many students birthdays are in April?” or “How many students like cookies as their favorite food?” This will engage the students in the activity along with helping them learn how to read graphs.
