

## **Weather Padlet**

**Grade** – Kindergarten

**Subject** – Science

**Tools** – Padlet and Google Docs

**Synopsis** – Students will choose one season and choose pictures to go with it. On Padlet, they will post these images along with at least one fun fact about the season that correlates with the picture. There must be 5 images. As students are presenting their images to the class, other students will be typing those fun facts into a google doc to save for later when they need to study. This is a good way for them to begin taking notes.
