Welcome!

The purpose of this video is to explain how to make a foldable! Yay!! Foldables are so much fun. They can be used for notetaking, organization, and studying.

The Materials you need for a foldable are:
- 3-4 pieces of copy paper. Can be more, can be different colors
- Stapler

Step 1:

You need to line up the sheets. Lay one sheet on the table. Next lay one on top of it, but about 1 inch from the top of the sheet. Continue this pattern until you have laid down all your sheets of paper.

Step 2:

Make sure all the papers are even on the sides. Next, fold the papers so that the flaps of the papers in the back are folded to the front above the folds that were visible. Crease this fold.

Step 3:

Now, staple the top to keep the fold tight. Congratulations, now you have your foldable!
