

## Storyboard for Personal VPOD

### Background:

- Born in Cave City, AR, Family information
- Live in Jonesboro, AR with my husband

### Hopes and Dreams:

- To live a fulfilling life
- To be the best wife I can be, eventually mother
- To be the best teacher I can be. Not just teach content, but teach social skills, love.
- Really just want to teach. Just a plain teacher. Focus on the students, not the status or money.

### My Philosophy:

-Discipline: Have patience, enforce rules. Make learning fun, good environment, but have understood rules that are enforced. Warning, Self-correct system.

-Diversity: We will celebrate our differences. Every person is unique. We will recognize everyone's experiences as a window into their lives. All children will be treated equally.

-*"You have brains in your head. You have feet in your shoes. You can steer yourself any direction you choose."*- Dr. Seuss

I hope to teach students to be in charge of their own education. I want them to discover on their own. Students should be involved in their education. They need to actively participate and make their learning meaningful to them.

### Technology:

-Technology opens so many doors for education. Children have access to information and programs in just seconds. I will teach my students not to depend on technology, but instead to use it as a tool to help supplement their learning.

-I believe Google provides awesome resources for teachers. I definitely plan on using Google Classroom, Google Docs, and Google Forms. They provide so many unique learning experiences that cannot be achieved in a traditional classroom. We will also use apps and websites that supplement the lessons.

-Professional Development: There are so many resources on the internet for teachers. PD can be done online through modules. You can also find out information about PD so quickly with technology. PD will always be needed and I am confident that I can use technology to access PD.
