

We Are Learning About Temperature!

Dear Parents and/or Guardians,

For the next three months, your child will be learning about temperature! Your child will be learning how to read a thermometer and measure temperature using different scales. Each day, the class will record the daily temperature and record it by using a table. As a class, we will find the average temperature of each week! Then, we will use that information to compare the temperatures at the end of November!

Sincerely,
Ms. Madsen

Help your child find their name on the chart so they are aware when they get to read the classroom thermometer!
