

E-Book

PowerPoint can be used in an unconventional way to create eBooks. This will allow students to get access to the book whenever needed. If I own a book and it is in my classroom, I can make an eBook out of it, so that it will be available for all my students. I could create eBooks about what we are learning to sum up important information.

I will use the light properties eBook while teaching the light unit. I will ask the students to read the book before the lesson. This will give them an idea about what we will learn. After going through the lesson and explaining everything, I will ask the students to read the book again and let me know if there is anything they did not understand. This will allow the students to go over the important parts of the lesson one more time before assessment.
