

Interactive Activity

This year we have a massive interactive activity for all our students to participate in.

This is a game where students will need to use their general knowledge, information from all content areas, search the web, and sometimes even create small projects to earn points. At the end, the top twenty students, with the most points, will win a special trip.

QR codes will be used. They are hidden everywhere throughout the fifth and sixth grade building. Each code will give you access to a new assignment. When the assignment is completed you will get clues on where the next QR code could be.

To start playing, you need to get a form from your class teacher and let the fun begin.
