DESCRIPTION OF APP:

Through this app, the user is able to create movies and edit videos. This app has various tools one can use to trim videos and sound. Through these tools, one is able to filter the video, add titles, edit the speed, add transitions and edit the audio. One is able to share the video with others and store in the Adobe cloud. Videos can be edited at the expense of the creator.

OUR REVIEW:

We enjoyed using this app to create and edit our own videos. The best thing about the app is the tutorial at the beginning to the app taking us through a trial video. It guided us through the different tools to edit the trial video to learn how to work the different functions. This app is user friendly. This app would be great for student use for projects. They can use it in creating school news videos and learning to interview others. Students can research a topic, create interview questions, record the interview, and edit the video. This app has multifunctional uses.

TYPE OF SOFTWARE/ ENVIRONMENT:

Software: This app is a tool software because it allows the user to create and edit videos or other types of media.

Environment: This app could be used in various environments, such as, mobile environment, teacher tool, one computer, and lab setting. With a mobile environment each student should have their own device to create and edit videos for projects. During a teacher tool, teachers can create their own videos as a teaching tool in class. In a one computer environment, students could work in groups using this app.

CURRICULUM:

This app could encourage students to make videos for projects, such as making a news story on a topic in any of the core subjects.
