DESCRIPTION OF APP:

This app opens up to a scanner to scan the QR code and be directed to the site attached to the code. There is an option to save the codes to app for future references. With the purchase of the VIP package, one can create their own code. A share option is available to share the code with others.

OUR REVIEW:

This app is a user-friendly app due to easy navigation and easy to learn. QR reader is a simple app that goes straight to its purpose. The only bad thing about the app is that a user does not have full access unless they purchase the VIP app. It scans the code, but will not direct the user to the site unless the package is purchased. This software can be used to create QR codes to teacher's or school's websites and enhance lesson plans.

TYPE OF SOFTWARE/ ENVIRONMENT:

Software: This software would be a tool. This app scans codes to direct to a site and allows a user to create their own code.

Environment: This app can be used in a mobile environment because each student needs the app downloaded to their own device to use.

CURRICULUM:

It can be used for the class or the school website. It could be used for a QR code scavenger hunt.
