

On-Line Tools

Kahoot

<https://kahoot.com/>

Kahoot is a free student-response tool for administering quizzes, facilitating discussions, or collecting survey data. It is a game-based classroom response system played by the whole class in real time.

I could/would use this for any subject (math, spelling, science, history, classroom rules, colors,) literally anything. I hope to teach the K - 1st grade and I can use this tool with them or someone working in high school could use this tool. I could use a concept as simple as shapes or colors.

Remind

<https://www.remind.com/>

Remind is a communication platform that helps educators reach students and parents where they are. Fast: Messages are sent in real time to an entire class, a small group, or just a single person. You can also schedule announcements ahead of time and attach photos and other files.

I would use remind101 to notify the parents in my class. I could use it to remind them of early dismissal, supplies needed, or to return forms.

Poll Everywhere

<https://www.polleverywhere.com/>

Poll Everywhere transforms one-sided presentations into two-way conversations with the audience. This web-based audience response system lets you embed interactive activities directly into your presentation. The audience responds on the web or via SMS texting on their phones.

Heather Smith

This would be a great tool to get to learn your students. I could use it to get to know their favorite foods, colors, music, or for educational matter. I could ask their favorite book genre or how many like to read. I could ask them to tell me their favorite book, etc.
