

Hannah Steinman  
Mini lesson 1

- 2nd grade
- Life Science: Types of matter
- Tools: Brain Pop video, Inspirations, and smartboard
- Synopsis: Throughout the week we would be learning about the types of matter. As a class we will watch a brain pop video on it. Then we will create a graphic organizer with the inspiration software. We will just put a lot of different liquids, gasses and solids on the page then they can go and move them to the write spot on the organizer.
