

Tariane King & Jady Brown

Title: AR Coding

Version: 1.0.2

Publisher/Producer: Valeriy Danyuk

Target Audience: 4+, made for ages 6-8

Types of software:

Curriculums:

Cost: Free download; full access \$2.99 and subscription \$1.99

Paragraph describing software:

This app is like coding, but you have to put in the correct code for the person to successfully get through the maze.

Paragraph on impressions; how it can be used in your class:

We would prefer to use Code Karts if we had to use an app like this. This can be like a brain game for the children to really think and use their minds to figure out the task/maze.

Pass or Fail: Pass; Code Karts would be a much better app to use.
