

Mini-Lesson

Grade Level/Audience: Kindergarten

Curriculum Topic: Colors

Tools: PowerPoint & Padlet

Student Collaboration: For the power point the students will be individual because they will be at their desks. For the Padlet board they will be in groups of three because they will be creating a padlet together.

Synopsis: This lesson will be over colors. The students will be learning their colors and I will be teaching them their colors through a PowerPoint and they will be creating a padlet board over a color they decide on. I will teach them a lesson on their colors. They will learn red, blue, yellow, orange, purple, pink, white, green, and black. I will show them a PowerPoint I have made about colors and different objects that are the same color as the one I'm teaching. Once we have gone through the PowerPoint, I will be showing them what a padlet board is. I will show them how to work it and what they are supposed to do. I will split them in groups of three and let them choose their favorite color and they will make a padlet board about the color. The padlet board must have the name of the color, pictures of the color, and pictures of objects that are the same color. They will present it to the class.
