

## Mini-Lesson

**Grade Level/Audience:** Kindergarten

**Curriculum Topic:** Learning how to spell and write letters of the alphabet and recognize the difference between capital and lower-case letters.

**Tools:** Clips and Inspiration

**Student Collaboration:** Students will watch the clips video and do the activity individually, and Inspiration will be as a class whole.

**Synopsis:** This lesson focuses on learning how to spell and write letters of the alphabet as well as recognizing the difference between capital and lower-case letters. My students will watch a clips video I have made on how to make a capital and lower-case a out of play dough. Once they have finished watching the how-to clip, I will pass out play dough and let them practice. After we have finished that, together as a whole we will look at the inspiration web I have created. On my web there will be a title that says capital letters and the other title will say lower-case letter. There will be circles with capital and lower-case letters in them, scattered all around. As a class they will determine which side the letters go on.
