

## Mini-Lesson

**Grade Level/Audience:** Kindergarten

**Curriculum Topic:** Spelling

**Tools:** Osmo & Kahoot

**Student Collaboration:** While play with Osmo the students will be in pairs and while playing the Kahoot game, students will be individual.

**Synopsis:** This lesson will cover spelling words that we are learning in the classroom. There will be a total of 10 spelling words, and the students should be familiar with them. I will pair the students and I will have Osmos genius starter kit up and each group will get a chance to go up. Osmo will have the different spelling words up there and they will have to practice spelling the words correctly. After each group has gotten the chance to go, I will create a Kahoot for the students to play. The Kahoot will contain the different spelling words and how-to spell is vs. how not to. The students will do this individually.
