## **How To-Make a Capital Letter A out of Playdough**

This how-to clips video was created to help students learn how to write their letters. In the how to video, I show my students how to make the capital letter A out of playdough. This video will be used when I am teaching my students how to write out their letter and when they are learning the alphabet. When we start learning the alphabet, and they are starting to trace their letters, I can use this video to show them how we are going to have fun while learning to write our letters. My students will have access to this video at all times, so that even if we aren't doing it at school, they are able to do it at home.
