

Measurement Mini Lesson

Grade Level: 3rd

Curriculum Topic: Math

Tools: Bee bot Robot and Rocket book

Before starting our lesson on measurements, the students will practice in groups with the Bee bot robot and their iPads. The students will create a small map on the tables that they are at in groups of 4 and then use the robot to go different directions. They will have to code the Bee bot a certain distance and then when it stops they will record their information in their rocket books. We will come together as a class and discuss what measurements they all recorded on their rocket books. We will also talk about what they liked about using the new Bee bot for math.
