Evaluation

Title: Plan Board

Version: 2.26.1

Publisher/Producer: Chalk.com Education Inc.

Target Audience: Teachers

Type of software: Tools, Tutorial

Justification: Plan Board is a tool for teachers to be organized with their lesson plans and keep track so they can always keep and reuse their lesson plans already created. Plan Board is also a tutorial because it is a planner for teachers.

How does it fit into curriculum: can be used to insert lesson plans, standards, or objectives into for organization purposes. In the classroom only for teachers.

Possible environment and why: Teacher tool, this is clearly for teachers only because it has a category for subjects and semesters. This app could be used by older students such as high schoolers.

Cost: FREE

Software description: Plan Board asks the viewer for their email, then it asks what subjects, and semesters the viewer has / taking. It gives a planner tab to keep up with activities or lessons a viewer is involved in.

Software impression: Plan Board is very limited as far as what it can do but, it has a planner, and tabs where you viewers can organize their subjects, and semesters. This app is similar to how google docs allows you to organize files into a set folder.
