

Spelling Word Mini Lesson

Grade Level: 3rd

Curriculum Topic: Language

Tools: Kahoot and Promethean Board

As a class we will review the students spelling words for the week on the app Kahoot. I will make a quiz that has their spelling words on the slides and one of them will be the correct spelling and the others will be wrong. I will show this game on the Promethean board and the students will use their iPads or phones to lock in their answers. This way I as the teacher can know exactly who needs extra help with their spelling, who has been studying, and which students have not. This is a fun way to have students engaged to the lesson and I can use it at the beginning of the week when they first get their words and at the end before their test.
