

Water Cycle Mini Lesson

Grade Level: 3rd

Curriculum Topic: Science

Tools: Inspiration and Smart Board

As a whole class we will watch a short video on the Smart Board from the Brain Pop website on how the Water Cycle works to give the students an idea as to what it is. After watching the video, the students will use their computers to create an Inspiration project on the Water Cycle. They will use the knowledge that they got from the video and recreate a water cycle in Inspiration. They will label each part as they remember from the video, and then later on after the students have learned correctly how the Water Cycle actually works they will use their Inspiration project to compare what they learned.
