

Evaluation

Title: iXL – Math

Version: 6.1.0

Publisher/Producer: IXL Learning

Target Audience: PreK- 12th __ students

Type of software: Drill and Practice

Justification: It is Drill and Practice because whenever you first click on the app, it asks you what you are or your student is having trouble with. Meaning, they are practicing what they are struggling with and already have been taught.

How does it fit into curriculum: : any math curriculum, language arts learning, and skill building

Possible environment and why: single user

Cost: Free. 10 questions a day for free. To become a IXL member \$19.99 per month

Software description: iXL Math app is additional practice for students who have learned content and are struggling with it. This app allows students to click their grade level, what subject within math they are struggling with and it already has set problems for practicing. It also keeps track of your progress and if you still are struggling, it keeps giving the viewer similar problems.

Software impression: iXL Math is great for students who are struggling in any area with math and need practicing. It specifically asks students their struggle points and helps students grasp the content with help and explanation. As a person who is not good with math and NEEDS an app like this, It is very helpful.
