

## Merge cube anatomy Mini Lesson

Grade level/ Audience: Mid level

Group size:2

Curriculum topic: science

Tools (be specific): merge cube for viewing the human heart, tablet for using merge cube, Padlet for getting assignment and discussion.

Synopsis of what you are doing including how you are using the technologies:

The merge cube has an augmented reality app that lets you hold the human heart in your hand and has parts labeled. The student will get the assignments off of padlet and use a tablet for the merge cube app to view the heart. After viewing the heart the students will discuss their findings on padlet with the rest of the class.
