

## Video research project Mini Lesson

Grade level/ Audience: Mid level

Group size: individual

Curriculum topic: any curriculum that can require a research paper, but instead of a paper they make a video

Tools (be specific): Computer or mobile device used to compile research of the web.

Webcam, mobile device with camera, or standalone camera to record themselves.

Video editing site such as wevideo.com

Synopsis of what you are doing including how you are using the technologies:

This will be like a normal research project but instead of writing a paper the student will be tasked with creating an informative video based on their topic. They will use the web to compile their research and then record themselves talking about their research and use a video editing tool to put in graphics if they have any or pictures.
